Career Objective

Aspiring Software Engineer with a strong foundation in Data Structures and Algorithms, having solved 800+ problems across coding platforms, along with knowledge of computer networks, operating systems, and backend development. Experienced in building secure applications and REST APIs using Java, Spring Boot, and MongoDB. Possess strong analytical, troubleshooting, and problem-solving skills, with an understanding of network protocols, system security, and application debugging. Eager to leverage technical expertise and communication skills at Zscaler to diagnose complex network and security issues, deliver effective customer solutions, and contribute to reliable cloud security operations.

Technical Skills

Programming: C++, C, Java, Python, JavaScript, SQL
Web & Backend: React.js, HTML, CSS, Spring Boot
Databases & Cloud: PostgreSQL, MongoDB, Google Cloud, MongoDB Atlas
Security & DevOps: JWT, RBAC, OAuth2, Docker, Git, Linux, Postman
Core CS & Applied Skills: DSA (800+ problems), OOP, OS, DBMS, Computer Networks, Distributed Systems, Microservices, Secure API Development

Projects

TicketFlow (Distributed Event Ticketing Platform) | *Spring Boot, Kafka, Kubernetes, PostgreSQL* Jun 2026 – Jul 2026
- Built a **microservices-based ticketing platform** serving **10K+ concurrent users** with User, Booking, Payment, and Notification services using REST/gRPC.
- Implemented **real-time seat locking** using Kafka and distributed transactions, preventing double booking under concurrent requests.
- Deployed on **Kubernetes** with Prometheus, Grafana, ELK logging, and audit trails for end-to-end observability.

PayLink (Peer-to-Peer Payments) | *React, Spring Boot, MongoDB, Stripe* Apr 2026 – May 2026
- Developed a secure **P2P payment platform** supporting **500+ daily transactions** with JWT-secured wallet APIs.
- Integrated **Stripe webhooks** with idempotent payment processing and automated refund workflows.
- Implemented **atomic wallet transfers**, audit logging, and role-based authorization for secure financial transactions.

ZeroTrust Gateway | *Spring Boot, React, Docker, JWT* Feb 2026 – Mar 2026
- Built a **Zero-Trust API Gateway** securing **3+ microservices** through JWT authentication and policy-based routing.
- Implemented **RBAC**, IP filtering, and centralized authentication for secure inter-service communication.
- Containerized services using **Docker**, enabling scalable deployment and fault isolation.

Internship & Training Experience

Java Trainee & Project Developer | Chandigarh University May 20, 2025 – June 30, 2025
- Completed six weeks of in-house Java training focused on core Java programming concepts.
- Strengthened understanding of object-oriented programming and Java fundamentals through structured training.

TeleConnect | *React.js, Spring Boot, MongoDB, Apache Kafka, WebSocket, Spring Security, JWT*

Built a real-time messaging platform using Spring Boot and WebSockets, supporting one-to-one and group conversations with persistent message history.
Integrated Apache Kafka for asynchronous message processing and scalable event-driven communication, with MongoDB for message storage.
Implemented JWT-based authentication, Spring Security, and role-based access control, with WebSocket connection management for secure messaging.

Education

Chandigarh University B.E. in Computer Science, CGPA: 7.89
Aug. 2023 – May 2027
Silver Line Prestige School, Ghaziabad XII (CBSE), 86.2%
2022
Holy Child School, Ghaziabad X (ICSE), 95.8%
2020

Achievements & Positions of Responsibility

3rd Position — ICP WCHL25 Qualification Round 2025

- Ranked **3rd nationally** among **6,000+ participants**; built a secure blockchain-based inheritance solution and received a **$200 award**.

Qualified Participant — Tekathon 2025 (SIH Internal Hackathon) 2025

- Qualified among **200+ teams** for the prototype implementation round in the internal SIH hackathon.
